Neither the delivery of this Prospectus nor any sale made in connection herewith shall, under any circumstances, create any implication that there has been no change in the affairs of the Issuer or the Guarantor since the date hereof or the date upon which this Prospectus has been most recently supplemented or that there has been no adverse change in the financial position of the Issuer or the Guarantor since the date hereof or the date upon which this Prospectus has been most recently supplemented or that any other information supplied in connection with the Notes is correct as of any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

The distribution of this Prospectus and the offering or sale of the Notes and the Guarantee in certain jurisdictions may be restricted by law. Persons into whose possession this Prospectus comes are required by the Issuer, the Guarantor and by each of Banco Santander, S.A., BNP Paribas, Citigroup Global Markets Limited, Deutsche Bank Aktiengesellschaft, Merrill Lynch International and MUFG Securities (Europe) N.V. (together, the "**Joint Lead Managers**") and Coöperatieve Rabobank U.A., Crédit Industriel et Commercial S.A., ING Bank N.V., Belgian Branch and Skandinaviska Enskilda Banken AB (publ) (together, the "**Co-Lead Managers**", and together with the Joint Lead Managers, the "**Managers**") to inform themselves about and to observe any such restriction. The Notes and the Guarantee have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**") or with any securities regulatory authority of any state or other jurisdiction of the United States. The Notes will be issued in bearer form and are subject to certain U.S. tax law requirements. Subject to certain exceptions, the Notes and the Guarantee may not be offered, sold or delivered within the United States or to U.S. persons (as defined in Regulation S under the Securities Act ("**Regulation S**") and as defined in the U.S. Internal Revenue Code of 1986, as amended and regulations thereunder). For a description of certain restrictions on offers and sales of the Notes and on distribution of this Prospectus, see "*Subscription and Sale*".

The Managers have not separately verified the information contained in this Prospectus. The Managers do not make any representation, expressly or implied, or accept any responsibility, with respect to the accuracy or completeness of any information contained in this Prospectus. Neither this Prospectus nor any other financial statements are intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by any of the Issuer, the Guarantor or the Managers that any recipient of this Prospectus or any other financial statements should purchase the Notes. Each potential purchaser of Notes should determine for itself the relevance of the information contained in this Prospectus and its purchase of Notes should be based upon such investigation as it deems necessary. Prospective investors should have regard to the factors described under the section headed "*Risk Factors*" in this Prospectus. This Prospectus identifies in general terms certain information that a prospective investor should consider prior to making an investment in the Notes. However, a prospective investor should conduct its own thorough analysis (including its own accounting, legal and tax analysis) prior to deciding whether to invest in any Notes as any evaluation of the suitability for an investor of an investment in the Notes depends upon a prospective investor's particular financial and other circumstances, as well as on the specific terms of

the Notes and, if it does not have experience in financial, business and investment matters sufficient to permit it to make such a determination, it should consult its financial adviser prior to deciding to make an investment on the suitability of the Notes.

MIFID II product governance / Professional investors and ECPs only target market – Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

IN CONNECTION WITH THE ISSUE OF THE NOTES, BNP PARIBAS (THE "**STABILISING MANAGER**") (OR A PERSON ACTING ON BEHALF OF ANY STABILISING MANAGER) MAY OVER-ALLOT NOTES OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, STABILISATION MAY NOT NECESSARILY OCCUR. ANY STABILISATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE NOTES IS MADE AND, IF BEGUN, MAY CEASE AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 CALENDAR DAYS AFTER THE ISSUE DATE OF THE NOTES AND 60 CALENDAR DAYS AFTER THE DATE OF THE ALLOTMENT OF THE NOTES. ANY STABILISATION ACTION OR OVER-ALLOTMENT MUST BE CONDUCTED BY THE RELEVANT STABILISING MANAGER (OR A PERSON ACTING ON BEHALF OF ANY STABILISING MANAGER) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

In this Prospectus, unless otherwise specified or the context otherwise requires, references to "EUR", "euro" and "€" are to the currency introduced at the third stage of the European economic and monetary union pursuant to the Treaty establishing the European Community as amended by the Treaty on European Union. References to "GBP" and "British pound sterling" are to the currency of the United Kingdom and references to "US\$", "USD" and "U.S. dollars" are to the currency of the United States of America.

Certain numerical figures and percentages set out in this Prospectus, including financial data presented in billions or millions, have been subject to rounding adjustments and, as a result, the totals of the data in this Prospectus may vary slightly from the actual arithmetic totals of such information.

Cautionary note regarding forward-looking statements

This Prospectus contains certain forward-looking statements, including statements using the words "believes", "anticipates", "intends", "expects" or other similar terms. This applies in particular to statements under the caption "*General Information*" and statements elsewhere in this Prospectus relating to, among other things, the future financial performance, plans and expectations regarding developments in the business of the JAB-Group. These forward-looking statements are subject to a number of risks, uncertainties, assumptions and other factors that may cause the actual results, including the financial position and profitability of the JAB-Group, to be materially different from or worse than those expressed or implied by these forward-looking statements. The Issuer and the Guarantor do not assume any obligation to update such forward-looking statements and to adapt them to future events or developments.

Alternative Performance Measures

The Issuer and the Guarantor believe that there are alternative performance measures (together, the "**Alternative Performance Measures**") which are useful in evaluating JAB-Group's operating performance, the net value of JAB-Group's portfolio and the level of JAB-Group's indebtedness. However, the Alternative Performance Measures are not recognized as measures under IFRS and should not be considered as substitutes for figures on result before taxes, net earnings, cash flow from/used in operating activities or other income statement or cash flow data, as determined in accordance with IFRS, or as measures of profitability or liquidity. The Alternative Performance Measures do not necessarily indicate whether cash flow will be sufficient or available for JAB-Group's cash requirements, nor whether any such measure is indicative of JAB Group's historical operating results. The Alternative Performance Measures are not meant to be indicative of future results. Because not all companies calculate these measures and figures in the same way, JAB-Group's presentation of the Alternative Performance Measures is not necessarily comparable with similarly titled measures used by other companies.

RISK FACTORS

Each of the Issuer and the Guarantor believes that the following factors may affect its ability to fulfil its obligations under the Notes or the Guarantee, respectively. All of these factors are contingencies which may or may not occur and each of the Issuer and the Guarantor is not in a position to express a view on the likelihood of any such contingency occurring.

Factors which the Issuer or the Guarantor believes may be material for the purpose of assessing the market risks associated with the Notes or the Guarantee are also described below.

Each of the Issuer and the Guarantor believes that the factors described below represent the principal risks inherent in investing in the Notes as guaranteed by the Guarantee. However, either the Issuer or the Guarantor may be unable to pay interest, principal or other amounts on or in connection with the Notes or the Guarantee, respectively, for other reasons and neither the Issuer nor the Guarantor represents that the statements below regarding the risks of holding any Notes as guaranteed by the Guarantee are exhaustive. Prospective investors should also read the detailed information set out elsewhere in this Prospectus (including any documents deemed to be incorporated by reference herein) and reach their own views prior to making any investment decision. Prospective investors should note that the risks relating to the Issuer and the Guarantor, their respective industries and the Notes summarised in this section are the risks that the Issuer and the Guarantor believe to be the most essential to an assessment by a prospective investor of whether to consider an investment in the Notes. However, as these risks relate to events and depend on circumstances that may or may not occur in the future, prospective investors should consider not only the information on the key risks summarised in this section, but also, among other things, should consult their financial, legal and tax advisers.

Risk Factors that may affect the Issuer/Guarantor's ability to fulfil its obligations under the Notes or the Guarantee, respectively

The Issuer, the Guarantor and the JAB-Group are exposed to certain risk factors affecting their respective abilities to fulfil their obligations under the Notes or the Guarantee, as the case may be. These risk factors relate to the business and operations of the Issuer, the Guarantor and the JAB-Group and include matters such as a decrease in the value of the JAB-Group's investments, a limited ability to raise capital and a failure to integrate newly acquired businesses. The following is a summary of these risk factors:

Market risks

Exposure to prices of investment assets

The Guarantor, as holding company, holds 100% of the Issuer via an intermediate holding company, JAB Investments S.à r.l. The Issuer is an investment company. The composition of the Issuer's investment portfolio may vary substantially from time to time (see the structure chart of the JAB-Group and its investments in the section "*Description of the Issuer*"). The market value of the portfolio directly and indirectly held by the Issuer and the Guarantor, respectively, is subject to the market prices of the assets comprising the portfolio. A decrease of such market prices may lead to a significantly lower market value of the portfolio, which may affect the creditworthiness of the Issuer, the Guarantor and/or the JAB-Group.

The Issuer holds, directly and indirectly, equity interests in listed and unlisted companies. The value of investments in listed companies is based on the market prices of the listed companies. The value of investments in unlisted companies is determined by employing various methods, including valuations based on multiples for comparable listed entities. Accordingly, changing market prices and conditions may adversely affect the value of the Issuer's assets. A sustained fall in equity and/or bond markets or changes in interest or exchange rates may reduce the Issuer's earnings significantly and for an extended period of time. The Issuer's expenses, e.g. interest expenses, may not decrease at the same rate as investment markets could

fall and if the Issuer is not able to manage its expenses effectively, the Issuer could experience significant and sustained losses as a consequence.

Commercial risks

Maintaining long-term ownership in holdings and a flow of investments in, and divestments from, new investment activities involves commercial risks, such as high exposure to certain industries or individual holdings, changing market conditions limiting attractive investment opportunities and barriers to exit from certain holdings at the chosen time.

Dependency on investment revenues

The Issuer is an investment company without any significant operating business and the Issuer's financial condition therefore depends on the performance of its investment activities. The Issuer depends primarily on the receipt of funds, distributions and dividends from its investments. The ability of the companies in which the Issuer is invested to make such payments depends on the companies' economic performance and financial condition. No assurance can be given that the Issuer will receive adequate funding to maintain its financial condition. These factors could materially and adversely affect the Issuer's ability to make payments on the Notes.

The same is true in respect of the Guarantor which depends solely on the economic performance and financial condition of the Issuer as its sole material investment.

Cyclical business at the level of the operating companies

The complex global economic situation affects the earnings of the investment holdings of the Issuer. In general, the sectors in which the investment holdings operate have historically been subject to highly cyclical demand and tend to reflect the overall performance of the economy, in certain cases even amplifying the effects of economic trends. Given the difficulty of predicting the magnitude and duration of economic cycles, there can be no assurances as to future trends in the demand for, or supply of, products and services sold by them in any of the markets in which they operate. Moreover, the markets in which the Issuer's investment holdings operate are exposed to variations in energy and raw material prices or a possible reduction in infrastructure investments. Accordingly, particular circumstances could have a material adverse effect on the earnings, business prospects and financial position of the Issuer's investment holdings.

Local market conditions

The Issuer's and the Guarantor's earnings and financial positions and those of their respective investment holdings are particularly influenced by the general state of the economy in the countries in which they operate and by the variables which affect performance, including increases or decreases in gross national product, access to credit, the level of consumer and business confidence, the cost of raw materials and the rate of unemployment.

Strong competition

The Issuer operates via its investment holdings in businesses which are intensely competitive. The Issuer and its holding companies compete on the basis of a number of factors, including brand recognition, fund performance, transaction execution, products and services, innovation, reputation and price. Many of their competitors have significant financial resources, experience and marketing strength, and may have the ability to offer a wide range of products and services and to introduce innovative products or services, which may enhance their competitive position.

SARS-CoV-2 pandemic

Pandemics, epidemics, outbreaks of infectious diseases or any other serious public health concerns, such as the outbreak of SARS-CoV-2 first identified in December 2019 and its associated disease ("**Covid-19**"), together with any measures aimed at mitigating a further expansion thereof, such as restrictions on travel,

imposition of quarantines, prolonged closures of workplaces, or curfews or other social distancing measures, may have a material adverse effect on the global economy and international financial markets in general and on the markets in which the JAB-Group operates in particular. The implications of such outbreaks depend on a number of factors, such as the duration and spread of the respective outbreak as well as the timing, suitability and effectiveness of measures imposed by authorities, the availability of resources, including human, material, infrastructure and financial (e.g., governmental stimulus packages and/or measures introduced by central banks) required to implement effective responses to the respective situation at the international, national and regional level as well as the level of civil compliance with such measures. There is no guarantee that such measures, or a combination thereof, are effective means to combat such an outbreak and the implications resulting therefrom.

A number of factors that are important for the JAB-Group and its investments to successfully conduct their respective businesses could be materially affected by the spread of Covid-19. The social distancing measures implemented by countries around the world to slow the spread of Covid-19 could result in a severe global recession and financial crisis. As economic activity is drastically reduced for several months, many businesses could be forced to close, leading to a dramatic increase in unemployment. As businesses and unemployed workers no longer have the income to pay their outstanding debts, the number of defaults could significantly increase.

While the majority of the investment portfolio of JAB-Group are focused on business sectors the JAB-Group considers to be resilient and non-discretionary, certain other investments, primarily in the retail restaurant, cosmetic and luxury sectors, are negatively affected. For example, in response to the global outbreak and pursuant to the exercise of emergency executive authority invoked by country, state and local governments, the restaurant and coffeehouse industry (which includes shops and restaurants operated by investments of JAB-Group such as Pret A Manger (Europe) Limited and Panera Holdings Corp) has been mandated to close or limit service at substantially all the restaurants and coffeehouses across the globe in order to combat the spread of SARS-CoV-2. The significance of the impact of the SARS-CoV-2 outbreak on the JAB-Group's investments cannot be conclusively assessed at the date of this Prospectus. However, a prolonged period of substantially reduced sales due to the pandemic could have a material adverse effect on their respective businesses, financial condition, results of operations and cash flows.

The Covid-19 pandemic and the measures implemented to combat the outbreak could materially adversely affect the earnings, business prospects and financial position of the Issuer's, the Guarantor's and the JAB-Group's investments and ultimately of the Issuer, the Guarantor and the JAB-Group.

Sector risks

The Issuer operates in consumer goods markets via its respective investments and intends to continue to do so in the future. Although these markets are generally stable and usually have moderate volatility or sensitivity, prospective investors should inform themselves about the different consumer goods markets in which the Issuer, the Guarantor and the JAB-Group operate via their respective investments. In addition, the Issuer is not restricted in its exercise of discretion concerning its investment decisions and it cannot be excluded that one or more investments in which the Issuer, the Guarantor or the JAB-Group participates will operate in other markets. Therefore, it is possible that the Issuer will invest in other markets in the future. These markets could be more volatile or sensitive, which could adversely affect the earnings, business prospects and financial position of the Issuer's, the Guarantor's and the JAB-Group's investments and ultimately of the Issuer, the Guarantor and the JAB-Group.

Liquidity Risk

The Issuer, the Guarantor and the JAB-Group mainly depend on the cash flow and returns derived from their respective investments in the form of dividends or other distributions. The Issuer or the Guarantor may be required to sell its respective investments in part or in whole in order to be in a position to pay interest and

principal on the Notes. Investors should note that the proceeds of any such sale may need to be applied for mandatory prepayment of financial indebtedness other than the Notes. As a consequence, Noteholders may be structurally subordinated in such a scenario. Furthermore, any such sale of the Issuer's or the Guarantor's assets may be at a time where the sale proceeds from such sale are not sufficient to pay interest and principal on the Notes. It cannot be excluded that, at the time of redemption or maturity of the Notes, no dividend will be paid under the investments of the Issuer and the Guarantor, no sale of the respective investments is possible, and no credit facility or other financing is available. If the Issuer and/or the Guarantor do not have sufficient liquid assets at the time of any payment, there is a significant risk that an investor in the Notes will lose all or some of its investment.

Referendum in the United Kingdom on its membership in the European Union

On 23 June 2016, the United Kingdom held a referendum on its membership in the European Union. A majority of the voters voted to exit the European Union ("**Brexit**"). On 29 March 2017, the government of the United Kingdom has given official notice of the United Kingdom's intention to leave the European Union and started the formal negotiation process. The United Kingdom left the European Union on 31 January 2020 with a transition period until 31 December 2020.

Negotiations commenced to determine the future terms of the United Kingdom's relationship with the European Union, including the terms of trade between the United Kingdom and the European Union and the United Kingdom's access to the European Union markets. The outcome of these negotiations as well as the time frame to implement the agreed arrangements is still very uncertain.

There are significant uncertainties as to what the impact will be on the fiscal, monetary and regulatory landscape in the United Kingdom, the conduct of cross-border business and export and import tariffs. There is uncertainty in relation to how, when and to what extent these developments will have an impact on the economy in the United Kingdom and the European Union, and on levels of investor activity and confidence, on global market performance and on exchange rates. Conversely, the final result may be seen as an incentive for other European countries to follow the British example, in which case there might be spill-over effects to other countries. In addition, the Brexit and the ongoing negotiations between the United Kingdom and the European Union could exacerbate financial market volatility.

Any of these developments, or the perception that any of these developments are likely to occur, could have a material adverse effect on economic growth or business activity in the United Kingdom, the Eurozone, or the European Union, and could result in the relocation of businesses, cause business interruptions, lead to economic recession or depression, and impact the stability of the financial markets, availability of credit, political systems or financial institutions and the financial and monetary system. Any of these effects of Brexit, and others the JAB-Group cannot anticipate today, could have material adverse effects on the business, net assets, financial condition, cash flows and results of operations of the JAB-Group.

Financial counterparty risk

The Issuer and the Guarantor are exposed to financial institution counterparty risk and will continue to be exposed to the risk of loss if counterparty financial institutions fail or are otherwise unable to meet their obligations. Financial services institutions are inter-related as a result of trading, counterparty and other relationships. The Issuer and the Guarantor have exposure to many different industries and counterparties and routinely execute transactions with counterparties in the financial industry, financial intermediaries, brokers and dealers, commercial banks and investment banks for their own account. Defaults by, or even the perceived creditworthiness or questioning of, one or more financial services institutions or the financial services industry in general, have led and may again lead to market wide liquidity problems and could also lead to losses or defaults. The exact nature of the risks faced by the Issuer and Guarantor is difficult to predict and guard against and the fact that many of the related risks to the business are totally, or in part, outside the control of the Issuer and the Guarantor.

Investment risks

The Issuer, the Guarantor and the JAB-Group have made their investment decisions based on sound financial grounds in accordance with their investment principles and have kept their leverage at a level in line with the rating of the Notes and the rating of the Guarantor. There is no assurance, however, that any current or future investments, if made, will not have a negative adverse impact on the Issuer's, the Guarantor's or the JAB-Group's financial condition in the short and/or medium term and on the rating of the Notes or the corporate credit rating of the Guarantor.

The investment portfolio of the Issuer is continuously monitored and analysed by the Issuer through constant dialogue with the management or through direct participation through members in the management board or supervisory board of the companies in which the Issuer, the Guarantor and the JAB-Group are invested. However, the Issuer, the Guarantor and the JAB-Group may not be able to significantly influence the strategy of each of their investments at all times, e.g. as result of a minority participation of other investors or the Issuer, the Guarantor and the JAB-Group are not the sole investors in their respective ultimate investments (see structure chart in the section "*Description of the Issuer*"). Consequently, other investors may block any strategic decision in respect of the ultimate operating companies of the Issuer's, the Guarantor's or the JAB-Group's investment. No assurance can be given in relation to the future performance of the Issuer's, the Guarantor's or the JAB-Group's investment portfolio nor can it be assured that the investment portfolio will not vary substantially from time to time or that the Issuer, the Guarantor or the JAB-Group, given their nature as investment companies/group, will not dispose in whole or in part of any of their respective investments.

No limitation on issuing further debt and guarantees or on investments

There is no restriction on the amount of debt or guarantees which the Issuer or the Guarantor may issue ranking equal with, or senior to, the obligations under or in connection with the Notes. Such issuance of further debt and guarantees may reduce the amount recoverable by the Noteholders upon insolvency or winding-up of the Issuer.

Additionally, neither the Issuer nor the Guarantor is subject to a restriction on investments in other entities, which could ultimately subordinate the Noteholders' claims to obligations of such entities towards their respective creditors.

Strategic risks

Failure to assess future market developments and/or overall negative economic development may adversely affect the businesses of the Issuer, the Guarantor and the JAB-Group. Corporate strategy risks can arise above all from the erroneous assessment of future market developments. Regulatory controls and changes in public policy may reduce the profitability of new or current business segments in which the Issuer is invested. Failure to evaluate potential acquisition targets, to integrate newly acquired businesses or to develop successfully new businesses may reduce the operating results of the Issuer. Significant unexpected costs for integration or development of businesses could also harm operating results.

Concentration risks

As of 31 December 2019, the direct and indirect principal investment holdings of the Issuer, the Guarantor and the JAB-Group in Acorn Holdings B.V. represented 58.4% of the gross asset value of the JAB-Group's assets. Other assets (such as Pret Panera I G.P. and Pret Panera III G.P., Cottage Holdco B.V., KK G.P., Petcare G.P. and JAB Luxury GmbH) represented 41.6% of the gross asset value of the JAB-Group's assets. While Acorn Holdings B.V., Pret Panera I G.P. and Pret Panera III G.P are themselves invested in a number of different companies providing for diversification, there is still a concentration risk within the portfolio whereby a loss affecting a single investment may have a significant negative impact on the overall performance of the Issuer, the Guarantor and the JAB-Group.

The results reported by the above-mentioned principal investment holdings will continue to significantly influence the Issuer's results and any failure to achieve the objectives, or a review of these objectives by those holdings as a consequence, inter alia, of the deterioration of the financial and economic condition and of global market conditions, may have a prejudicial effect on the results of operations, balance sheet and financial results, the activity, strategies and prospects of the Issuer, the Guarantor and the JAB-Group.

Currency exchange risks

Significant fluctuations in exchange rates affect the financial results of the Issuer, the Guarantor and the JAB-Group. A significant portion of the JAB-Group's investments and related operations are outside the Eurozone. Despite employing mechanisms to hedge against currency exchange risk, the JAB-Group cannot preclude that fluctuations in currencies of countries outside the Eurozone, especially in U.S. dollar and British pound sterling as of the date of this Prospectus, may materially affect the results of the JAB-Group, including the Issuer and the Guarantor.

Group structure risks

The obligations of the Issuer and the Guarantor incurred under the Notes or the Guarantee, respectively, are solely obligations of the Issuer and the Guarantor. Any other JAB-Group entity or company in which the Issuer is invested does not have any obligation, contingent or otherwise, to pay any amounts due under the Notes or the Guarantee or to make funds available to the Issuer or the Guarantor to pay any amounts due under the Notes or the Guarantee. Furthermore, any claim of the Issuer in respect of its investments will rank behind any claims in respect of indebtedness incurred, and guarantees issued, by the company in which the Issuer is invested and claims of preference shareholders in such companies (if any). Therefore, the Notes and the Guarantee will effectively be subordinated to creditors and preference shareholders (if any) of the Issuer's direct and indirect investments.

Operational Risks

Insurance coverage

The JAB-Group seeks to cover foreseeable risks through insurance. Such insurance coverage comprises management and usual liability risks. However, these insurances may not fully cover the risks to which the JAB-Group is exposed. This may be the case for insurance covering legal and administrative claims as well as for insurance covering other risks. For certain risks, adequate insurance coverage may not be available on the market or may not be available with reasonable conditions. Consequently, any harm resulting from the materialisation of these risks could result in significant capital expenditures and expenses as well as liabilities, thereby harming business and operating results.

Key personnel risk

Success of the JAB-Group's business depends on the expertise and the dedication of the employees of the JAB-Group. The JAB-Group continuously strives to recruit qualified staff and to foster company loyalty. The risk of qualified employees leaving is particularly acute in key positions.

IT-system failures

The JAB-Group is, to some degree, dependent on IT-infrastructure and IT-systems. Any interruptions in, failures of or damage to its IT-infrastructure and IT-systems could lead to delays or interruptions in the business processes of the JAB-Group. In particular, the IT-systems of the JAB-Group may be vulnerable to security breaches and cyber-attacks from unauthorised persons outside and within the JAB-Group. The JAB-Group cannot guarantee that anticipated or recognised malfunctions can be avoided by appropriate preventive security measures in every case. The materialisation of one or more of these risks could have material adverse effects on the business of the JAB-Group.

Issuer's and Guarantor's financial information

The Issuer's and the Guarantor's historical consolidated financial and operational performances may not be indicative of their respective future operating and financial performances. There can be no assurance of the Issuer's or Guarantor's continued profitability for future periods.

Estimates and assumptions in the financial information of the Issuer and the Guarantor

The financial statements of the Issuer and Guarantor require the management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Key assumptions and estimates are described in the notes to the financial statements of the Issuer and the Guarantor incorporated by reference into this Prospectus. Management uses its judgement especially for the classification of the Guarantor as an investment entity according to IFRS 10, for selecting appropriate valuation techniques for the fair value determination of the JAB-Group's investments and redeemable shares and accounting for share-based payment transactions.

If any of these estimates or assumptions are subsequently found to be incorrect, the valuation figures may also be incorrect and may have to be reconsidered. This could have material adverse effects on the JAB-Group's net assets, financial condition or results of operations.

Changes in tax law

The business of the JAB-Group is subject to the general tax frameworks in Luxembourg and the Netherlands. Its tax burden is dependent on various aspects of tax laws as well as their application and interpretation. Tax laws can be changed retroactively, and their application/interpretation can be amended by the tax authorities and the courts. These possibilities can also increase the tax burden of the JAB-Group and could have a material adverse effect on the business, net assets, financial position, cash flow and income of the JAB-Group.

Rating risks

The Issuer's/Guarantor's/JAB-Group's ability to compete successfully in the market for funding depends on various factors, including financial stability as reflected by its operating results and credit ratings assigned by recognised credit agencies. As a result, a downgrade in such credit ratings may impact the Issuer's/Guarantor's/JAB-Group's ability to raise funding, which could adversely affect its business, financial condition and results of operations.

As of the date of this Prospectus, the rating of the Guarantor is Baa2 with stable outlook, as assigned by Moody's Investors Services Limited ("**Moody's**"), and A- with a positive outlook, as assigned by Standard & Poor's Rating Services, a division of The McGraw-Hill Companies, Inc. ("**S&P**").

Credit ratings are susceptible to change at any time, and in light of the above, the Guarantor's corporate credit rating could be downgraded at any time in accordance with the rating agencies criteria.

Please also refer to "*Credit ratings may not reflect all risks and are subject to change*" below.

Risk Factors related to the structure of the Notes

Notes may not be a suitable investment for all investors

Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement;

- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact such investment will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

The Notes may be purchased as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to a potential investor's overall portfolio. A potential investor should not invest in the Notes unless it has the expertise (either alone or with the help of a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of such Notes and the impact this investment will have on the potential investor's overall investment portfolio.

Fixed Rate Interest

The Notes will bear a fixed rate interest on their outstanding amount. Investors are exposed to the risk that the price of the Notes may fall because of changes in the market yield. While the nominal interest rate (i.e. the coupon) of the Notes is fixed during the life of the Notes, the market yield typically changes on a daily basis. As the market yield changes, the price of the Notes changes in the opposite direction. If the market yield increases, the price of the Notes typically falls. If the market yield falls, the price of the Note typically increases. Investors should be aware that movements of the market yield can adversely affect the price of the Notes and can lead to losses for the investors.

Investors should also be aware that the market yield has two components, namely the risk-free rate and the credit spread. The credit spread is reflective of the yield that investors require in addition to the yield on a risk-free investment of equal tenor as a compensation for the risks inherent in the Notes. The credit spread changes over time and can decrease as well as increase for a large number of different reasons. The market yield of the Notes can change due to changes of the credit spread, the risk-free rate, or both.

In addition, investors are exposed to reinvestment risk with respect to proceeds from coupon payments. If the market yield declines, and if investors want to invest such payments in comparable transactions, investors will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields.

Re-investment Risk

The Issuer is entitled to terminate the Notes early upon occurrence of a Gross-up Event (as defined in the Terms and Conditions). If the occurrence of such event becomes likely, the market value of the Notes will probably be negatively affected and will generally not rise substantially above the price at which the Notes can be redeemed.

In the case of such early redemption an investor may not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Depending on the situation of the financial markets at the time, an investor may even be unable to reinvest the redemption proceeds at all within a reasonable timeframe. Potential investors should consider reinvestment risk in light of other investments available at that time.

Long-term securities

The Notes 2027 will be redeemed on 17 April 2027 and the Notes 2035 will be redeemed on 17 April 2035, unless they have been previously redeemed. The Issuer is under no obligation to redeem the Notes at any time before this date. Investors have no right to call for early redemption of the Notes except following a Change of Control or the occurrence of an Event of Default (each as further described in the Terms and Conditions). In the event that an investor calls the Notes early investors may suffer a lower than expected yield and may not be able to reinvest the funds on the same terms. In the case of an Event of Default, the redemption proceeds may be lower than the invested amount and be zero resulting in a total loss for investors.

Risks in connection with the application of the German Act on Issues of Debt Securities (Gesetz über Schuldverschreibungen aus Gesamtemissionen)

An investor is subject to the risk of being outvoted and of losing rights against the Issuer against his will where other investors agree to amendments of the Terms and Conditions by majority vote according to the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*) (the "**Bond Act**"). Noteholders shall pass resolutions by simple majority of the voting rights participating in the vote. According to Section 5(4) of the Bond Act, a qualified majority of at least 75% of the voting rights participating in the vote is required if material provisions of the Terms and Conditions are to be amended. Any meeting of Noteholders shall have a quorum requiring Noteholders representing at least 50% of the outstanding Notes by value (Section 15(3) of the Bond Act) to be present at the meeting. If the quorum is not achieved during the (first) meeting, the chairman may convene a second meeting. Generally, the second meeting does not require a quorum, subject to any resolutions which require a qualified majority, in which case Noteholders representing at least 25% of the outstanding and not suspended (*nicht ruhend*) Notes must be present at the relevant meeting. In the case of an appointment of a noteholders' representative for all investors, a particular investor may lose, in whole or in part, the possibility to enforce and claim his rights against the Issuer regardless of other investors.

10% quorum in case of certain events of default

The Terms and Conditions provide that, in case of certain events of default, any notice declaring the Notes due and payable shall become effective only when the paying agent has received such default notices from Noteholders representing at least 10% of the aggregate principal amount of Notes then outstanding. In addition, under the Bond Act, even if a default notice had been given by a sufficient number of Noteholders, the Noteholders could rescind such acceleration by majority resolution within three months. A simple majority of votes would be sufficient for a resolution on the rescission of such acceleration but, in any case, more Noteholders would have to consent to a rescission than have delivered default notices.

Clearing System

The Notes will be represented by one or more Global Notes. Such Global Notes will be deposited with Clearstream Banking Aktiengesellschaft, Eschborn ("**Clearstream Frankfurt**" or "**Clearing System**"). Investors will not be entitled to receive definitive Notes. Clearstream Frankfurt will maintain records of the beneficial interests in the Global Notes. While the Notes are represented by one or more Global Notes, investors will be able to trade their beneficial interests only through Clearstream Frankfurt and the Issuer will discharge its payment obligations under the Notes by making payments to Clearstream Frankfurt or to its order for distribution to their account holders. A holder of a beneficial interest in a Global Note must rely on the procedures of Clearstream Frankfurt to receive payments under the Notes. The Issuer has no responsibility or liability for the records relating to, or payments made in respect of beneficial interests in the Global Notes.

Legal investment considerations may restrict certain investments

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (1) Notes are legal investments for it, (2) Notes can be used as collateral for various types of borrowing and (3) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

European Initiative on Financial Transaction Tax

On 14 February 2013, the EU Commission adopted a proposal for a Council Directive (the "**Draft Directive**") on a common financial transaction tax ("**FTT**"). According to the Draft Directive, the FTT shall be implemented by certain EU Member States, including Germany.

The proposed FTT has very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. The issuance and subscription of Notes should, however, be exempt.

According to the coalition agreement between the German Christdemocratic Party, the German Social Union and the German Socialdemocratic Party the current German government still has the intention to introduce an FTT. In June 2018, Germany and France agreed to further pursue the implementation of an FTT in the EU for which the current French financial transaction tax (which is mainly focused on transactions regarding shares in listed companies with a market capitalization of more than EUR 1 billion) could serve as a role model. Therefore, France and Germany recently presented a common position paper on the introduction of an EU-wide FTT based on the French model to the High-Level Working Party at a meeting of the Council of the European Union.

Nevertheless, the FTT and its scope remains therefore subject to discussions and it is currently uncertain if and when the proposed FTT will be enacted and when it will take effect with regard to dealings in the Notes. Prospective holders of the Notes should consult their own tax advisers in relation to the consequences of the FTT associated with subscribing for, purchasing, holding and disposing of the Notes.

Tax impact of the investment

An effective yield on the Notes may be diminished by the tax impact on an investment in the Notes. Payments of interest on the Notes, or profits realised by investors upon the sale or repayment of the Notes, may be subject to taxation in their respective home jurisdiction or in other jurisdictions in which it is required to pay taxes. The tax impact on investors generally in Germany, the Netherlands and Luxembourg is described in the section "*Taxation*"; however, the tax impact on individual investors may differ from the situation described for investors generally.

All investors are advised to contact their own tax advisers for advice on the tax impact of an investment in the Notes. Examples of a taxation risk that investors should consider together with their advisers include among others the risk of double taxation (in Germany and their home jurisdiction or another country, if applicable).

Change in tax law

Investors should be aware that tax regulations and their application by the relevant taxation authorities are subject to change, possibly with retrospective effect, and that this could negatively affect the value of the Notes. Any such change may cause the tax treatment of the Notes to change from the tax position at the time of purchase and may render the statements in this Prospectus concerning the relevant tax law and practice inaccurate or insufficient to cover the material tax considerations in respect of the Notes. It is not possible to predict the precise tax treatment which will apply at any given time and changes in tax law may give the Issuer the right to redeem the Notes.

No obligation to pay additional amounts if Dutch interest withholding tax applies to payments made by the Issuer in respect of the Notes

The Netherlands introduced a withholding tax on interest payments which will enter into effect as of 1 January 2021. This interest withholding tax will apply to interest payments directly or indirectly made by a Dutch entity, like the Issuer to affiliated entities (i) in low-tax jurisdictions designated as such by the Dutch Ministry of Finance (generally, a jurisdiction (a) with a corporation tax on business profits with a general statutory rate of less than 9%, or (b) a jurisdiction included in the EU list of non-cooperative jurisdictions), or (ii) in certain abusive situations. Generally, an entity is considered to be affiliated (*gelieerd*) to another entity for these purposes if such entity, either individually or jointly if the entity is part of a collaborating group (*samenwerkende groep*), has a decisive influence on the other entity's decisions, in such a way that it, or the collaborating group of which it forms part, is able to determine the activities of such other entity. An entity, or the collaborating group of which it forms part, that holds more than 50% of the voting rights in the Issuer, or in which the Issuer holds more than 50% of the voting rights, is in any event considered to be affiliated. An entity is also considered to be affiliated if a third party holds more than 50% of the voting rights both in such entity and the Issuer.

In case as of 1 January 2021 this interest withholding tax applies to payments made by the Issuer in respect of the Notes, the Issuer will make the required withholding of such taxes for the account of the relevant Noteholders without being obliged to pay any additional amounts to the relevant Noteholders in respect of the interest withholding tax. Prospective investors in the Notes should consult their own tax advisers as to whether this interest withholding tax could be relevant to them.

Change of law in general

The Terms and Conditions of the Notes are based on German law in effect as of the date of issue of the relevant Notes. No assurance can be given as to the impact of any possible judicial decision or change to German law or administrative practice after the date of issue of the Notes.

Risks related to the market generally

The secondary market generally

Although application has been made for the Notes to be listed on the Official List of the Luxembourg Stock Exchange and to be admitted to trading on the Euro MTF, the Notes may have no established trading market when issued, and one may never develop. Even if a market develops, it may not be liquid. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case to the extent the Notes are sensitive to interest rate, currency or market risks. The Notes may be very price volatile and as a consequence only a limited secondary market may develop (if any). Illiquidity may have a severely adverse effect on the market value of the Notes.

Exchange rate risks and exchange controls

The Issuer will pay principal and interest on the Notes in Euro. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than Euro. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Euro or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Euro would decrease (1) the Investor's Currency-equivalent yield on the Notes, (2) the Investor's Currency equivalent value of the principal payable on the Notes and (3) the Investor's Currency equivalent market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

Credit ratings may not reflect all risks and are subject to change

The ratings assigned to the Guarantor and the Notes, respectively, may not reflect the potential impact of all risks related to structure, market, additional factors discussed above and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

Rating agencies may also change their methodologies for rating companies such as the Guarantor and securities with features similar to the Notes in the future. If the rating agencies were to change their practices in the future and the ratings of the Guarantor and the Notes, respectively, were to be subsequently lowered, this may have a negative impact on the trading price of the Notes.

The market value of the Notes could decrease if the creditworthiness of the Issuer, the Guarantor or the JAB-Group deteriorates

If the likelihood decreases that the Issuer and the Guarantor will be in a position to fully perform all obligations under the Notes and the Guarantee, as applicable, as they become due, for example, because of the materialisation of any of the risks regarding the JAB-Group, the Issuer and/or the Guarantor, the market value of the Notes may fall. In addition, even if the likelihood that the Issuer and the Guarantor will be in a position to fully perform all obligations under the Notes as they fall due does not decrease, market participants could nevertheless have a different perception. Furthermore, the market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business as the JAB-Group could change for the worse. If any of these risks materialises, third parties may only be willing to purchase Notes for a lower price than before the materialisation of mentioned risk. Under these circumstances, the market value of the Notes may decrease.

Transaction costs

Transaction costs reduce the yield an investor will realise on the investment in the Notes. When Notes are purchased, several types of incidental costs (including transaction fees and commissions) are incurred and will have to be paid by the buyer in addition to the then prevailing market price. Similarly, when an investor sells any Notes, such incidental costs will reduce the actual price an investor will receive for each Note sold. These incidental costs may significantly reduce or even exclude the profit potential of an investment in the Notes. For instance, credit institutions as a rule charge their clients commissions which are either fixed minimum commissions or *pro rata* commissions depending on the order value. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic Managers or brokers in foreign markets, investors must take into account that they may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs).

In addition to such costs directly related to the purchase of Notes (direct costs), investors must also take into account any follow-up costs (such as custody fees). Investors should inform themselves about any additional costs incurred in connection with the purchase, custody or sale of the Notes before investing in the Notes.

Margin lending

Margin lending, where it is permitted, can materially increase the risk to investors of incurring losses. If a loan is used to finance the purchase of the Notes and the Notes subsequently go into default, or if the trading price diminishes significantly, an investor not only has to face a potential loss on its investment, but it will also still have to repay the loan and pay interest thereon. This may significantly increase the risk of a loss. Investors should not assume that they will be able to repay the loan or pay interest thereon from the profits of a transaction. Instead, investors should assess their financial situation prior to an investment, as to

whether they are able to pay interest on the loan, or to repay the loan on demand, even if they face losses on such investment.

Market volatility and other factors

The trading market for debt securities may be volatile and may be adversely impacted by many events. The market for debt securities is influenced by economic and market conditions in Germany and, to varying degrees, by market conditions, interest rates, currency exchange rates and inflation rates in other European and other industrialised countries. There can be no assurance that events in Germany, Europe or elsewhere will not cause market volatility or that such volatility will not adversely affect the price of Notes. Investors also bear the risk that economic and market conditions will have any other adverse effect on the trading pattern and the market value of the Notes.

Legal and Arbitration Proceedings

The Issuer is a defendant in a stockholder class action and derivative lawsuit pending in the Delaware Court of Chancery under the caption "In re Coty Inc. Stockholders Litigation, Cons. C.A. No. 2019-0336-AGB". The Issuer is named as a defendant along with three other JAB affiliates, the Guarantor, JAB Cosmetics, B.V., and Cottage Holdco B.V, which the complaint alleges all have acted in concert to control Coty. The plaintiffs, stockholders of Coty, allege that controlling stockholders of Coty breached fiduciary duties to the minority stockholders in connection with a partial tender offer for shares of Coty. Plaintiffs contend that the tender offer injured the stockholders who tendered because it was purportedly coercive and unfairly priced. Plaintiffs also contend that the non-tendering stockholders were injured because the JAB entities gained mathematical control of Coty as a result of the tender offer, thereby depriving the minority stockholders of a control premium. The case is still at its early stages. The Issuer intends to move to dismiss the complaint. That motion is currently pending.

The Issuer and the JAB-Group may from time to time be involved in further disputes in the ordinary course of its business activities. ⁶ S&P defines "A-" as follows: An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.
